

***Stop existing rust
and protect clean
metal.***

Xtroll Rust Conqueror

How does it work?

Xtroll Rust Conqueror stops existing rust AND prevents further rust in all light, medium and heavy vehicles, trailers, fixed plant, buildings, wash areas, coal prep plants, etc.

Xtroll Rust Conqueror is a powerful rust-penetrating, moisture-repelling clear varnish like coating. It penetrates the rust layers while impregnating the underlying metal surfaces, creating a 99% pore-free isolating film. It embeds rust in its substance and bonds the rust back to the surface. It will stop further under film corrosion.

- Penetrates and stops existing rust
- Prime, seal and penetrate a wide range of material surfaces
- Needs little preparation
- Hard-drying clear finish that can be painted over

Coverage

1L covers up to 30m² (brush/spray roller) on clean, well prepared surfaces.

Available sizes:

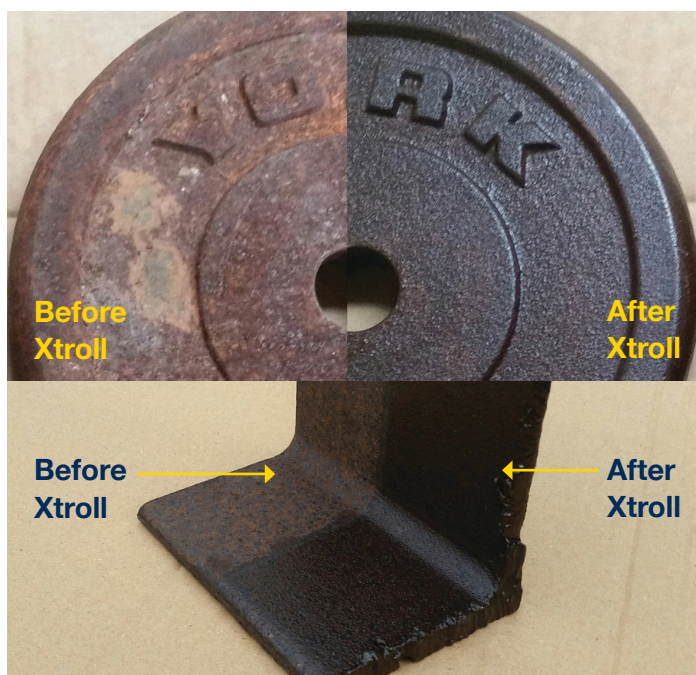

1 Litre 4 Litre 20 Litre

Directions for use:

Before applying, remove any loose/flaky rust and paint. Oils, grease, fats and millscale must also be removed.

Rinse with clean fresh water and allow to dry. Apply light coats sufficient to saturate the rust until a lasting gloss finish is obtained. If matt areas are apparent, apply an additional coat before the first coat has dried. Apply by brush, roller or by spray gun.

Before/After:

 ***Proudly Australian Made and Owned***
