

***An affordable solution
for large and bulk fuel
users that delivers.***

Bulk Fuel Treatment

How does it work?

This bulk diesel fuel treatment not only cleans but successfully maintains engines and emission control equipment. Keeping stored diesel algae free and stopping fuel oxidation. This concentrated formula is a high treat rate – low cost way to protect your fleet and reduce costs!

Premium Diesel Treatment is added directly to bulk storage tanks when refueling or via a calibrated dosing system.

Premium Diesel Treatment is a fully inclusive diesel fuel treatment used to protect fleets from engine failure, carbon deposits and reduce tank cleaning expenses

- Injector and fuel system cleaner
- Turbo and DPF Cleaner
- Engine decarbonizer
- Fuel Bug Biocide
- Water dispersant & anti-corrosive
- Long term fuel storage stabilizer

Available sizes:

5 Litre 20 Litre 200 Litre 1000 Litre

Dosage/Instructions:

1L treats 4500L of diesel

Bulk Fuel Treatment can be added directly to bulk fuel tanks when refueling. Metered dosing tanks can also be installed for larger sites.

5 Litres treats 22,500 Litres of diesel

20 Litres treats 90,000 Litres of diesel

Independent results:

Premium diesel treatment has been successfully used throughout Australian Mining and transportation industries.
