Cost Effective
Maintenance

AFTERMARKET ADDITIVE SPECIALISTS

Cost Effective Maintenance premium additives are the culmination of 40 years of intensive research, development, and real-world testing in industries like long-haul transportation, large-scale mining, and off-road motorised equipment.

Our broad range of premium fuel and oil additives are highly concentrated, cost-effective solutions designed to help you save both time and money by reducing the need for costly repairs and maintenance over the lifespan of your vehicle or equipment.

Cost Effective Maintenance is committed to delivering some of the most effective, authentic, and cost-efficient automotive fuel and oil additives on the market. Backed by decades of scientific research and field testing, our products have proven their value in diverse industries, including mining operations and the trucking/transport sector.

Our goal is simple: to provide our customers with the most affordable solutions to their maintenance challenges. Thanks to Cost Effective Maintenance additives, thousands of engines have been spared from costly rebuilds, and essential components like fuel systems, transmissions, hydraulics, differentials, and final drives have enjoyed exceptionally long and productive service lives.

PREMIUM ADDITIVE RANGE

AW10 ANTIWEAR

ENGINE OIL ADDITIVE

- > Reduce friction & wear
- > Decrease operating temperature
- > Improve performance
- > Cut noise & rattles
- > Lower component stress
- > Prolong equipment life

AW10 Antiwear is purposely formulated to deliver tremendous increases in lubricant load carrying ability, wear reduction and friction/heat abatement.

Increase the load carrying capacity of your oil, whether it be engine, transmission, final drive or hydraulics with AW10 Antiwear Oil Enhancer. The high load carrying ability ensures far superior protection against abrasive and adhesive wear than oil alone can. Transmissions will run cooler, both manual and automatic, with much, much less wear. Hydraulic systems too will operate at a cooler temperature.

Available sizes:

1L / 5L / 20L / Bulk

Treat Rate:

Engines: 20mL treats 1L oil (2% ratio)
Transmissions: 50mL treats 1L oil (5% ratio)
Hydraulics/Auto Transmissions: 10mL treats 1L oil (1% ratio)

Suitable for:

Diesel & Petrol engines
 DPF compatible

FLUSHING OIL CONCENTRATE

ENGINE OIL ADDITIVE | ENGINE OIL FLUSH

- > Remove engine sludge
- > Free sticking piston rings
- > Cut smoke, blow-by & oil use
- > Restore cylinder compression
- > Safe with all oil seals, O-rings
- > No abrasive or corrosive solvents

Flushing Oil Concentrate restores pristine cleanliness to the dirtiest of both diesel and gasoline internal components and has saved thousands of engines from expensive rebuilds.

Removes harmful and performance-draining sludge, hard carbon and other contaminants and deposits from oil-wetted engine components. Not only does it restore full cleanliness to the entire crankcase, removing all engine sludge, but it also frees up stuck piston rings, restoring compression and oil control and reducing blow-by.

Available sizes:

250mL / 1L / 5L / 20L / Bulk

Treat Rate:

Clean up: 125mL for every 10L oil.
Maintenance: 25mL for every 10L oil thereafter.

Suitable for:

Diesel & Petrol engines
 DPF compatible

PREMIUM ADDITIVE RANGE

CLEANPOWER

FUEL ADDITIVE | INJECTOR CLEANER

- > Cleans injectors & all fuel system
- > Lubricate upper cylinders
- > Optimize fuel efficiency
- > Reduce exhaust smoke
- > Easier starting – hot & cold
- > Smooth idle

Cleanpower is an extremely powerful fuel system and injector cleaner designed to restore engine performance.

It effectively removes stubborn deposits in fuel injectors that most standard products can't handle. By using Cleanpower, you can improve power, fuel efficiency, and overall driving quality without needing to overhaul or replace injectors. Suitable for gasoline and diesel.

Available sizes:

250mL / 1L / 5L / 20L / Bulk

Treat Rate:

10mL treats 40L fuel. We strongly recommend to double dose the first tank for best results.

Suitable for:

Diesel & Petrol engines
DPF compatible

CRD FUEL ENHANCER

DIESEL ADDITIVE | DIESEL INJECTOR CLEANER

- > Avoid expensive injector & pump costs
- > Boost diesel fuel lubricity
- > Clean high pressure fuel systems
- > Quieten noisy injectors
- > Restore fuel economy & performance
- > DPF compatible

CRD Fuel Enhancer is the most effective, heavy duty diesel fuel system treatment for Ultra-Low Sulfur Diesels.

CRD Fuel Enhancer is the solution for most Ultra Low Sulfur High Pressure Diesel problems – it cleans fuel pump and injector deposits, disperses contaminants as they form, and boosts today's Ultra Low Sulfur Diesel fuel lubrication properties. It is a total high-pressure diesel fuel system treatment!

Available sizes:

250mL / 1L / 5L / 20L / Bulk

Treat Rate:

10mL treats 80L fuel.

Suitable for:

Diesel-only formulation
DPF compatible

PREMIUM ADDITIVE RANGE

FTC DECARBONIZER

FUEL TREATMENT | ENGINE DECARBONIZER | DPF CLEANER

- > Deglaze & de-coke engines
- > Reduce blow-by & oil use
- > Increase engine efficiency
- > Cut harmful emissions
- > Stop excessive exhaust smoke
- > Ultimate DPF cleaner

FTC Decarbonizer is a truly unique combustion catalyst. It oxidizes hard carbon from combustion and exhaust spaces, turbos and DPFs. It makes fuel combust much faster, easier and cleaner – significantly reducing emissions! And it extends engine life.

It is a proven, safe and effective real-life fix for engine-destroying cylinder glaze (which is essentially carbon packed into the cylinder bore cross hatch) and carbon in combustion and exhaust spaces. Use FTC Decarbonizer before you rebuild your engine.

Available sizes:

1L / 2L / 5L / 10L / 20L / Bulk

Treat Rate:

1L treats 1600L fuel. We strongly recommend to double dose the first tank for best results.

Suitable for:

Diesel & Petrol engines
DPF compatible

MARINE DIESEL STABILIZER

TOTAL FUEL SYSTEM CLEANER

- > Prevent fuel oxidation
- > Eliminate diesel fuel organisms
- > Deglaze & de-coke engines
- > Stop smoke, oil use & blow-by
- > Reduce exhaust emissions
- > Clean & lubricate fuel injectors
- > Stabilize diesel for long-term storage

Marine Diesel Stabilizer is a comprehensive solution for marine diesel fuel issues. It eradicates microorganisms like bacteria and fungus, preventing re-contamination and ensuring the fuel remains clean. Ideal for restoring aged diesel and maintaining new fuel, it helps prevent oxidation, fouling deposits, and protects against rust and corrosion.

It lubricates and cleans fuel injectors, removes carbon buildup, reduces exhaust smoke, and disperses deposits with concentrated detergents. It's perfect for long-term fuel storage and ensures clean burning of aged diesel.

Available sizes:

1L / 5L / 20L / Bulk

Treat Rate:

10mL treats 80L fuel.

Suitable for:

Diesel-only formulation
DPF compatible

PREMIUM DIESEL TREATMENT

BULK FUEL TREATMENT

- > Reduce DPF Regens
- > Cut harmful emissions
- > Improve fuel efficiency
- > Eliminate exhaust smoke
- > Fix blow-by & oil use
- > Ultimate diesel stabilizer
- > Premium injector cleaner & lubricant
- > Protect against rust & corrosion in fuel
- > Reduce fleet costs

Premium Diesel Treatment is a state-of-the-art bulk-fuel treatment that deals effectively with many issues associated with today's stringent emission regulations and the accompanying spin-offs of modern Ultra Low Sulfur Diesel.

The rigorously tested and proven formula provides a solution that is technically practical, environmentally beneficial, and highly effective in reducing costly repairs and maintenance, excessive fuel usage, and unwelcome downtime.

It provides significant, measurable bottom-line benefit to operators of diesel equipment in all industries or projects that store and use bulk diesel.

Available sizes:

5L / 20L / Bulk

Treat Rate 1:4500

5L treats 22,500L of diesel
20L treats 90,000L of diesel

Suitable for:

Diesel only formulation
DPF compatible

NEW! WORKSHOP RANGE

A PREMIUM RANGE OF LEADING EDGE, HIGHLY-CONCENTRATED, LOW DOSE-RATE FUEL AND OIL ADDITIVES

DIESEL INJECTOR CLEANER+

- ✓ Premium additive
- ✓ Fuel system cleaner
- ✓ Clean injectors/ Fuel Pumps
- ✓ DPF Compatible

DIESEL ENGINE DECARBONIZER

- ✓ De-coke Turbo / DPFs / Catalytic Converters
- ✓ Cleans DPF and prevents blockages
- ✓ Combustion Catalyst
- ✓ Workshop use only

DPF CLEANER DECARBONIZER

- ✓ Manual regeneration cleaner
- ✓ Avoid DPF blockages
- ✓ Reduce DPF regeneration time

PETROL FUEL BOOSTER

- ✓ Injector cleaner
- ✓ Turbo and Catalytic converter cleaner
- ✓ Restore engine power and economy
- ✓ Premium treatment

ENGINE OIL FLUSH

- ✓ Suitable for Petrol and Diesel
- ✓ Removes engine sludge
- ✓ Solvent Free / Detergent based
- ✓ DPF Compatible

ENGINE ANTIWEAR

- ✓ Reduce engine wear
- ✓ Improve oil quality
- ✓ DPF Compatible

DIFF & TRANS STOP WEAR

- ✓ Improve gear changes
- ✓ Reduce diff and gearbox temperatures
- ✓ Added corrosion protection

ULTIMATE RADIATOR FLUSH*

- ✓ Ultimate radiator flush
- ✓ Cooling system cleaner
- ✓ Pump and hose preserver
- ✓ Fluorescent leak detector
- ✓ Non-hazardous glycol replacement

*Ultimate Radiator Flush is made in USA

SINGLE DOSE FUEL ADDITIVES

DIESEL INJECTOR CLEANER

PREMIUM FUEL SYSTEM CLEANER
150 ML

- ✓ Clean injectors and fuel pumps
- ✓ Smooth idle
- ✓ Restore power
- ✓ DPF Compatible

Workshop Directions

Add directly to diesel fuel tank.

Dose rate

1 bottle per vehicle.
Out of Spec injectors: add a second bottle.

Suitable for:

- Diesel-only formulation
- DPF compatible

PETROL FUEL BOOSTER

PREMIUM INJECTOR CLEANER
150 ML

- ✓ Injector cleaner
- ✓ Turbo and Catalytic converter cleaner
- ✓ Restore engine power and economy
- ✓ Premium treatment

Workshop Directions

Add directly to petrol fuel tank.

Dose rate

1 bottle per vehicle.

Suitable for:

- Diesel & Petrol engines
- DPF compatible

DIESEL ENGINE DECARBONIZER

COMBUSTION CATALYST
150 ML

- ✓ De-coke Turbo, DPFs and Catalytic Converters
- ✓ Cleans DPF and prevents blockages
- ✓ Reduces Exhaust smoke and emissions

Workshop Directions

Add directly to diesel fuel tank.

Dose rate

1 bottle per vehicle.

Suitable for:

- Diesel-only formulation
- DPF compatible
- DO NOT use with DPF Cleaner Decarbonizer

DPF CLEANER & DECARBONIZER

MANUAL REGENERATION
CLEANER 150 ML

- ✓ Clean DPFs/manual regeneration
- ✓ Avoid DPF blockages
- ✓ Reduce DPF regeneration time
- ✓ Workshop use only

Workshop Directions

Add directly to diesel fuel tank before manual regeneration.

Dose rate

1 bottle per vehicle.

Suitable for:

- Diesel-only formulation
- DPF compatible
- DO NOT use with Diesel Engine Decarbonizer

SINGLE DOSE ENGINE ADDITIVES

ENGINE OIL FLUSH

PREMIUM ENGINE OIL FLUSH
200 ML

- ✓ Removes engine sludge
- ✓ Restores cylinder compression
- ✓ Free sticking piston rings
- ✓ Solvent Free / Detergent based

Workshop Directions

Add 1 bottle to engine oil for 30 minutes of engine run time. Complete the oil change and allow a significant drain time. Badly sludged petrol engines may require 60 minutes run time or a second application to dissolve hardened oil deposits. Do not leave additive in the engine when returning the vehicle to the customer.

Dose rate

1 bottle added directly to the engine oil prior to oil change.

Suitable for:

- Diesel & Petrol engines
- DPF compatible

ULTIMATE RADIATOR FLUSH*

COOLING SYSTEM CLEANER
200 ML

- ✓ Pump and hose preserver & lubricant
- ✓ Fluorescent leak detector
- ✓ Non-hazardous glycol replacement
- ✓ Reduces overheating problems

Workshop Directions

Add 1 bottle directly to radiator or overflow reservoir. Contamination will float to the surface of the radiator/overflow after 5,000 km. Badly contaminated systems may require backflushing before next recommended service. Antifreeze can be added at a 10% ratio.

Dose rate

1 bottle added directly to radiator or overflow reservoir.

Suitable for:

- Diesel & Petrol engines

DIFF & TRANS STOP WEAR

ENGINE OIL ADDITIVE 100ML

- ✓ Improve gear changes
- ✓ Reduce diff and gearbox temperatures
- ✓ Avoid differential wear
- ✓ Added corrosion protection

Workshop Directions

Differentials: Add 1 bottle directly to vehicle differential oil (one bottle per diff).

Manual Gearbox: Add 2 bottles directly to gearbox oil.

Automatic Transmissions: Add 1 bottle directly to automatic transmission fluid.

Suitable for:

- Diesel & Petrol engines
- Mineral & Synthetic oils

ENGINE ANTIWEAR

ENGINE OIL ADDITIVE 200ML

- ✓ Reduce engine wear
- ✓ Improve oil quality
- ✓ Reduce friction

Workshop Directions

Add directly to vehicle engine oil after the oil change is completed.

Dose rate

1 bottle treats up to 10L of engine oil.

Suitable for:

- Diesel & Petrol engines
- Mineral & Synthetic oils
- DPF compatible

*Ultimate Radiator Flush is made in USA
